

# 20th European Congress of Obstetrics and Gynaecology

## WELCOME LETTER

The Congress will bring you up to date information about all aspects of Obstetrics and Gynaecology. All of the major European specialist societies will contribute to the programme. There will be lectures from some of Europe's foremost experts. There will be hands-on sessions where you can learn new techniques. There will be scientific sessions to keep you up to date with the latest advances. Best of all, there will be hundreds of your colleagues from all over Europe so that you can exchange ideas and compare experiences.

This will be a wonderful opportunity to be in touch with developments in the specialty while enjoying the beautiful city of Lisboa. The science, the entertainment and the compar

# 18th Portuguese Congress of Obstetrics and Gynaecology

## WELCOME LETTER

Fellow Colleagues,

The Federation of the Portuguese Societies of Obstetrics and Gynaecology (FSPOG) was established in 2005, thanks to the joint efforts of the Society of Obstetrics and Gynaecology, of the Society of Gynaecology, of the Society of Reproductive Medicine and the Menopause Society.

As President of this Federation I am very pleased, in my own name and on behalf of all the members of the federated societies, to welcome you to the 18th Portuguese Conference of Obstetrics and Gynaecology and to the 20th Conference of the European Board and College of Obstetrics and Gynaecology (EBCOG).

The two conferences will run sequentially from 4 to 8 March, 2008, in Lisbon, with one only registration, and the Portuguese Congress will be held in both Portuguese and English.

We have exerted our best efforts to provide guests and delegates with an excellent scientific programme, covering the most significant areas of the specialities, as well as an enjoyable social programme in the beautiful, welcoming and cosmopolitan city of Lisbon.

*Carlos Freire de Oliveira*

President FSPOG

## EUROPEAN BOARD AND COLLEGE OF OBSTETRICS AND GYNAECOLOGY (EBCOG)

EBCOG is the Board of the Section of Obstetrics and Gynaecology of the Union Européenne des Médecins Spécialistes (UEMS). The purpose of UEMS is to harmonise and improve the quality of medical specialist practice in the EU. Based in Brussels, EBCOG was set up in 1996 and currently has 33 member countries.

EBCOG's aim is to improve the health of women and unborn and newborn babies by promoting the highest possible standards of care. To do this EBCOG brings together eminent professionals from all its member countries and also works closely with the four subspecialist pillars of Materno-Fetal Medicine (the European Association of Perinatal Medicine), Gynaecological Oncology (the European Society of Gynaecological Oncology), Reproductive Medicine (the European Society of Human Reproduction and Embryology) and Urogynaecology (the European Urogynaecology Association). Significantly, EBCOG has been formally recognised by the International Federation of Gynaecology and Obstetrics (FIGO) as the organisation which officially represents European Gynaecologists within FIGO.

EBCOG's core activities are education and training and EBCOG has produced a specialist training programme and log book and, together with the subspecialist societies, has developed training programmes and log books for each of the subspecialties. A programme for 'Training the Trainers' is currently being developed.

In addition EBCOG has a hospital visiting and accreditation system, via which hospitals can request a visit from EBCOG and, subject to the outcome of the visit, can be accredited for a five year period as an EBCOG-recognised training centre. A subspecialist visiting programme began recently and subspecialist training centres can now receive joint recognition by EBCOG and the relevant subspecialist society.

EBCOG is very keen to ensure that it represents obstetricians and gynaecologists from Europe as a whole, and one of its successful strategic priorities has been to increase membership from central and eastern European countries.

## CME CREDITS (EUROPE)

The 20th European Congress of Obstetrics and Gynaecology is accredited by the European Accreditation Council for Continuing Medical Education (EACCME) to provide the following CME activity for medical specialists.

The EACCME is an institution of the European Union of Medical Specialists (UEMS).

The European Congress of Obstetrics and Gynaecology is designated for a maximum of 6 European CME Credits (ECMEC) for a full day attendance and 3 for half day.

Each medical specialist should claim only those hours of credit that he/she has actually spent in educational activity.

EACCME credits are recognized by the American Medical Association for the Physician's Recognition Award (PRA). To convert EACCME credit to AMAPRA 1 credit, contact the AMA.

The attendance certificate is available at the CME desk, upon return of the CME evaluation form.

**Learning objectives:** this seminar will give an introduction to the main epidemiological principles and study designs. Formal training in this area is usually not part of the medical curriculum, although having the tools of epidemiology and statistics is an asset for clinical practice. In a workshop format, participants will learn to apply some key concepts while appraising a scientific paper. No prior knowledge of epidemiology/statistics is required. All concepts introduced will be explained in the course.
