CIRIEC International (the International Centre of Research and Information on the Public, Social and Cooperative Economy) is an international, non-governmental scientific organization which brings together enterprises and entities of the social economy (cooperatives, mutual societies, foundations and cultural and philanthropic associations) and of the public sector, as well as people interested in these fields. The aims of this organization, which was founded in 1947, include promoting international exchanges between the different types of enterprise that are focused on serving the collective or general interest and between business people and the scientific world. Its Scientific Commission "Social and Cooperative Economy" integrates experts in this research field from around twenty countries all over the world and develops research working groups, public funded research projects, seminars and, since 2007, biennale International research conferences in Victoria (Canada), Ostersund (Sweden), Valladolid (Spain) and Antwerp (Belgium).

CIRIEC-Portugal, founded in 1988, is a non-profit scientific association that researches the field of public and social economics. It is based at Lisbon and brings together social economy researchers from Portuguese universities as well as some of the main social economy sector organizations in Portugal.

The general theme for this 5th Research Conference is "Social economy in a globalized world".

There will also be specialized workshops dedicated to the CIRIEC workgroup "Social Economy and Territories" and to scientific journals, their current situation and challenges.
